DESIGN BY

CB design lab

CB Design Lab places great importance on continuous dialogue and communication with its clients. Through this dynamic exchange of ideas and perspectives, both parties enrich each other and achieve the best results. This collaborative vision has been enthusiastically embraced by ETMA which, in collaboration with CB Design Lab, is developing numerous innovative projects. This synergy between the two teams underscores their commitment to excellence and shared success.

CB DESIGN LAB

THE STORY BEHIND

DESIGN FOR BEAUTY

Good design always comes from the combination of form and function. The FINN Collection beautifully exemplifies this through its bracket and shell, which are not only examples of refined technology but, with their curved lines and distinctive shape, allow FINN to stand out and become instantly recognizable and iconic.

DESIGN FOR EFFICENCY

The FINN Collection presents an innovative approach to seating with its adaptable design centered around an iconic bracket. This bracket not only defines the collection with its strong graphic and sculptural identity but also provides exceptional functionality and flexibility. Remarkably, a single design supports the structures of both the chair and stool, as well as the canteen table.

DESIGN FOR PEOPLE

At the heart of every successful design project is the person and their well-being. With this goal in mind, the FINN family received special attention to ergonomics: the curvature of the seat and backrest was meticulously designed to ensure comfort and suitability for both short and extended use.

DESIGN FOR HARMONY

ETMA strives to continually improve every aspect of its products. This dedication drives the company to innovate and enhance its manufacturing processes, transportation, and product usability. By investing extra thought into the design phase, ETMA creates high-quality designs that remain affordable for clients while also producing sustainable products that positively impact the environment for today and tomorrow. In developing the FINN Collection, all phases of the product life cycle were carefully considered, resulting in a product designed to withstand the test of time.

CHAIR & STOOL

CHAIR & STOOL

ARMREST CHAIR

Thanks to its adaptable and flexible design, the FINN chair is also available with armrests.
